MARCIN WOJTALA

Engineering Leader | Portfolio Management Systems | High-Performance Platforms

London, UK | (+44) 7500905701 | 1985mars@gmail.com | LinkedIn | GitHub

---

SUMMARY

Engineering leader with 15+ years delivering high-performance, low-latency platforms for financial services. Currently building multi-asset portfolio management systems ($8B+ AUM) at JP Morgan Chase, scaling 80B+ daily transaction architecture to multi-region with sub-millisecond data replication. Deep expertise partnering with portfolio managers, research desks, and middle office teams to translate investment strategies into resilient, real-time trading infrastructure.

Core Expertise: Front-Office Systems | Low-Latency Platforms | Portfolio Management | Real-Time Data | Event-Driven Architecture | Global Team Leadership | Quality Driven Development | Agile Software Delivery | Resiliency | Scalability

---

TECHNICAL SKILLS

Languages & Frameworks: Java, Spring Boot, Maven | C#, .NET | TypeScript, React, Next.js | Python | Node.js

Distributed Systems & Caching: GemFire Cache, Apache Ignite, Redis | Kafka, Event-Driven Architecture | Multi-Region Database Replication

Cloud & Infrastructure: AWS (EKS, Lambda, EC2, Lightsail, Beanstalk, Bedrock) | Kubernetes, Docker | Terraform (Infrastructure as Code)

APIs & Architecture: REST, GraphQL | Microservices | Monolith-to-Microservices Migrations | CQRS, Event Sourcing

CI/CD & DevOps: Jenkins, GitHub Actions, GitLab CI | Automated Pipelines | Blue-Green Deployments

Security & Quality: Snyk, SonarQube, Veracode | PactFlow (Contract Testing) | BlazeMeter, k6 (Performance Testing) | Chaos Engineering

---

PROFESSIONAL EXPERIENCE

JP Morgan Chase | London

Executive Director – Multi-Asset Portfolio Management Systems *December 2022 – Present*

Leading engineering for multi-asset portfolio management platforms serving $8B+ AUM across North America, EMEA, and APAC regions.

- **Portfolio Systems:** Building target allocation engines (SAA/TAA), research feeds integration, alpha screening, exposure management, portfolio construction, and order execution systems
- **Scale & Performance:** Scaled 80B+ daily transaction architecture to multi-region with low-latency data replication using GemFire and distributed caching
- **Stakeholder Partnership:** Partnering directly with portfolio managers, research desks, and benchmark teams; systems integrate with enterprise risk management frameworks
- **Global Leadership:** Managing distributed engineering teams across US, UK, India, and APAC; driving architectural standards and engineering excellence
- **AI & Innovation:** Executive sponsorship for AI/agentic development adoption and automation initiatives
- **Quality & Resilience:** CTO representative for Test & Automation; established chaos engineering, contract testing, and performance testing practices
- **DevSecOps:** Championing CI/CD modernisation with Terraform IaC, security tooling integration (Snyk, SonarQube, Veracode), and automated pipelines

Technologies: Java, Spring Boot, React, TypeScript, AWS (EKS, Lambda), GemFire, Kafka, Terraform, Jenkins, PactFlow

Bottomline Technologies | Reading

Senior Engineering Manager – High-Throughput Financial Transactions *May 2020 – December 2022*

Built and led engineering team delivering platforms supporting 2B+ daily distributed financial transactions.

- **Platform Delivery:** Architected event-driven microfrontend systems for real-time payment processing with strict latency SLAs
- **Open Banking:** Integrated Open Banking API for seamless financial data connectivity and compliance
- **Team Growth:** Grew engineering team by 200% in first 12 months through strategic hiring and talent development
- **Technical Vision:** Created technical roadmap via contextual maturity matrix; established engineering standards and best practices

Technologies: React, WPF, C#, .NET, Node.js, AWS, Kafka, Microfrontends, CI/CD Pipelines

---

Oxford University Press | Oxford

Application Architect / Development Manager – Platform Engineering *April 2019 – May 2020*

Hands-on architecture leadership for globally distributed Higher Education platform team.

- **Infrastructure:** Implemented container-driven infrastructure (Docker) and CI/CD pipeline modernisation
- **Cloud Architecture:** AWS services including Elastic Beanstalk, S3, EC2, and serverless functions (Lambda)
- **DevSecOps:** Established security-first engineering practices; close partnership with security team on Ways of Working

Technologies: Java, Node.js, TypeScript, Docker, AWS (Elastic Beanstalk, S3, EC2, Lambda), CI/CD

Verizon Media (AOL + Yahoo) | London

Creative Solutions Manager – AdTech Creative Platforms *August 2012 – April 2019*

Led globally distributed engineering team (16+ developers) building ad creative systems integrating with real-time bidding infrastructure.

- **Creative Platforms:** Built and scaled ad creative delivery systems integrated with RTB platforms (Erlang-based)
- **Global Scale:** Scaled creative technology solutions across global AdTech infrastructure
- **Team Leadership:** Managed distributed teams across in-house, remote, and offshore locations (7 years)

Technologies: JavaScript, Java, APIs, Creative Delivery Systems

---

EDUCATION & CERTIFICATIONS

Year	Qualification	Institution
2024	AWS Certified Cloud Practitioner	Amazon Web Services
2023-2024	Investment Essentials Certification	CFA Institute
2015-2016	MSc Creative Industries Management (Merit)	University of the Arts London
2009-2010	PG Certificate, Digital Media Management	Hyper Island, London
2004-2007	BA (Hons) Design for Interactive Media	University of the Arts London

Professional Development

- **Agile & Leadership:** SAFe Agilist, Scrum Master, Extreme Programming (XP), Servant Leadership principles
- **Cloud & Infrastructure:** AWS architecture patterns, Kubernetes administration, Terraform workflows
- **Security & Accessibility:** DevSecOps practices, OWASP security principles, WCAG accessibility standards, inclusive design
- **Financial Services:** Investment principles, portfolio management fundamentals, risk frameworks
